As wide spread as the continent of North America. But the crowning glory of his life remains to be attained in his discovery, or rather combination, for he does not claim to have been the discoverer of CEDEON, which is the basis of the Bitters now offered to the public. That henor belongs to the native inhabitants of Central America, to whom its virtues have been known for more than two hundred years. Armed with it, the Indian bids defiance to the most deadly malaria and handles without fear the most venomous serpents. Itis a belief with them, that while there is breath in the body the Cedron is potent to cure, no matter what the iseas may be.
While Dr. Bull is not prepared to endorse this extrava-

THRE Company holds by lease, and in fee, abou twenty thousand acres of the most select coat lands in Western Indiana, bordering both sides of the Wabash river. Maps of these lands may be seen at the office of the Company, in Covington, ind., at the office of Wm. Dale, No. 25 Park Place, N. Y. City, at the office of Hon. J. R. Coffroth, Huntington, Indiana, and at the office of Roach & McDouald, Indianapolis.

A reference to the report of the Hon. David Dale Owen, late State Geologist, will show that these lands are gituate in the midst of the finest coal fields of the State, abounding also in sait, iron and other valuable State, abounding also in sait, iron and other valuable mineral substances.

Near the mouth of Coal Creek, where the Company has large quantities of lands salt water has been discovered equal in quality to the Kanawha. This water was pro-cured some 36 years ago by boring, soon after, the On-ondaga salt finding its way down the Wabash and Erie Canal, Mr. Thomas, the proprietor, finding himself un-able to compete with it, abandoned the manufacture. In his boring he encountered that which recently dis-

closed facts prove to have been coal oil

Those lands all lie in close proximity to the Wabash
and Eric Canal, some of them upon its banks.

Mr. John McManomy, the business agent of the company, has retuined from a tour of observation of the oil regions of Pennsylvania, convinced that the lands leased by the company, in Fountain and Parke counties, has, so far as the general formation of the country and the surface indications present themselves, a stong analogy in the oil and mineral substances as found on French Creek, Pennsylvania, where the greatest quantity and the most valuable oil is found Mr. McManomy has purchased for the company the most approved machinery, with all the fixtures necessary for operation, and is preparing with experienced workmen the speedy development of the hidden treasure of the lands of the comp All the indices of coal oil, found in localities where it has been procured, are strongly marked in various lo-calities of the lands of the Company affording every rational prospect of success. The company thinks it unpecessary to make any other reference to the character of the lands, other than the report and map referred to. \$100,000 of the stock, being 2,000 shares, is proposed by the Company to be offered in the market at one-half ts par value, being \$25 per share, for the purpose of aiding the Company in a speedy development of the apr25-d&wif

> From the New York Evening Express. "Our telegraphic dispatches received to day from the Oil Regions, inform us of the striking of a 200 barrel flowing well on Cherry Run, NEAR THE FIRST NATIONAL PETROLEUM COMPANT'S PROPERTY. Cherry Run Stocks will be in demand to-morrow."

[From the New York World.] "THE FIRST NATIONAL PETROLEUM COMPANY is a first-class organization, whose officers are of the highest standing, and we cheerfully recom-mend it to all parties desirous of purchasing re-liable stocks. The General Superintendent is a pioneer in the Oil business, and well known as a most efficient manager."

[From the New York Tribune.] "THE FIRST NATIONAL is the name of the Pe troleum Company whose prospectus and map are before us. The names which we see among the Directors are ample recommendations for this Company, and a sufficient guarantee of its future management."
